Highlighted Project:

Chat Bot (GitHub Repository)

Developed a chatbot using React.js for the frontend and Django with MySQL for the backend. The bot can answer Python-related questions using integrated AI models. Deployed on AWS Ubuntu with GPU instance (g4dn.xlarge).

Key Skills:

- Python scripting and automation
- GitHub API integration
- Django backend development
- MySQL database management
- React.js frontend development
- AI model integration (DeepSeek-R1, DialoGPT)

Sample Work:

See attached **github_automation_sample.py** for an example script demonstrating GitHub API automation and data retrieval in Python.
